RE: Letter of Recommendation

To Whom it May Concern,

RTD Enterprises was the successful bidder for EWEB's Santa Clara 20 Million Gallon Reservoir re-lining and re-cover project. This project involved replacing approximately 5 acres of 45 mil Hypalon cover with a polypropylene (45 mil) cover, and relining the reservoir with a 36 mil polypropylene liner.

Dan Emery was the project manager for the contractor. Mr. Emery and his crews provided EWEB with a high quality and professional installation of the liner and cover. Mr. Emery worked collaboratively with EWEB and our engineer (MWH-Americas, Portland, Oregon) in keeping the construction schedule on track and keeping construction change orders to a minimum.

Our operation and maintenance crews were invited to work closely with RTD. EWEB was able to learn the operation of the new cover and de-watering system as it was being constructed.

The outcome of the project was successful, RTD met our tight construction and start-up schedule and we came under our budget by a significant amount. I would not hesitate to recommend RTD and Dan Emery as a qualified contractor for re-covering/re-lining of reservoirs with polypropylene materials.

If you have any questions about this project please call me at 541-341-1878.

Sincerely,

Mel Damewood III, P.E.
Water Engineering Manager
